## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submissions filed on 2/2/2007 and 3/29/2007 have been entered.

### ***Claim Objections***

2. The amendment filed 2/2/2007 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: Claim 1 recites the limitation "image, non-advertisement content". The specification specifies that the content may be images, but makes no mention that the images that are analyzed exclude advertisement images or images to be used as advertisements.

Applicant is required to cancel the new matter in the reply to this Office Action.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. **Claims 1-3 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Gindele (U.S. Patent No. 6,785,421).** Gindele teaches a method of targeting promotional items based on pictures that includes all of the limitations recited in the above claims.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

**Regarding claims 1-3 and 5,** Gindele teaches extracting image content from a user storage device and analyzing it (Column 2, Lines 16-30), correlating an advertisement for a product or service to the image (Column 2, Lines 16-30), and returning the advertisement to the user storage device to be displayed (Column 7, Lines 29-50). Gindele also teaches extracting place information from the pictures and

categorizing pictures according to that extracted information (Column 9, Lines 1-3).

Since the images are on a computer, the information extracted relates to the use of an electronic device.
